

JOSHUA FERNANDO

Software Engineering Student

About Me

Final year Software Engineering student at the University of Westminster. I build full-stack web and mobile products, and I spent a year as a software engineering intern at Applova inc, shipping restaurant SaaS across web, POS and kiosk apps. I also take on freelance work for real businesses, and perform live as a guitarist and vocalist.

Skills

- Programming (JAVA, Typescript, Python)
- Web (React, Angular, Spring Boot, Next.js)
- Mobile (Flutter, React Native)
- Data & Cloud (SQL, Supabase, Firebase, Google Cloud)
- Tools (Git, JIRA, REST APIs)

Education

University Of Westminster 2023 -Present

BEng (Hons) Software Engineering Final year

Final Year Project: Designing and evaluating an explainable, real-time, domain aligned IoT network intrusion detection system.

Informatics Institute of Technology 2022 - 2023

Foundation Certificate in Higher Education – IT

- Passed with a Distinction

ST. Joseph Vaz College 2011 - 2022

GCE Ordinary Level, 2021 - 9A passes

Catholic, Sinhala, English Language, Mathematics, History, Science, Western Music, Business & Accounting Studies, and ICT

Experience

Software Engineering Intern Jul 2025 – Jun 2026

Applova Inc.

- Part of the core engineering team building SaaS products for the restaurant industry.
- Shipped full-stack features across Merchant Web, Admin Web, POS and self- ordering Kiosk apps, from UI and REST APIs through database changes to production deployments.
- Built merchant-facing enhancements, including CRM opt-out controls.
- Co-built an internal Customer Success dashboard from the ground up to flag at-risk merchants, with data visualisation, Zoho CRM and Desk integrations, automated reports and real-time Google Chat alerts.

Java · Spring Boot · React · SQL · REST APIs · OAuth 2.0 · Zoho CRM & Desk APIs · Google Cloud · Git · Jira

Projects

Workloader · Personal web app

A planner for students and busy schedules. Organises work into projects, tasks, subtasks and events, with reminders, a calendar and a dashboard for work left, overdue items and upcoming deadlines. Google sign-in syncs everything to the cloud. Techstack used to build: React · TypeScript · Tailwind CSS · Supabase

workloader.vercel.app

Achievements

TRINITY College London

Symphony Trophy
2015

Highest Overall Marks Obtained from Grade IV - VI String
2015

Extracurricular

Solo guitar and vocals at pubs, restaurants and hotels in Negombo and Colombo

Classical guitar, TRINITY College London Grade 8 with Distinction (Dec 2022). Preparing for ATCL

First clarinet, school brass band (2016-2023), including the western orchestra and All island School Music Competition

All Island Inter School Western Music & Dance, Mixed Instrument - Second Place, 2016

Projects

Flowstock · Freelance mobile app
Operations app for a grocery distributor running two delivery trucks, replacing a manual, phone-based process. The owner manages stock, shops and truck allocations while reps create bills on the road and print them over Bluetooth or Wi-Fi, with live sync and role- based access. Techstack used to build: React Native · Expo · TypeScript · Supabase
Private client project

RuuWear · Freelance web store
Online clothing store for RuuWear, a fashion label launching its debut linen collection. In active development, with the launch page already live. Techstack used to build: React · TypeScript · Vite · Supabase
ruuwear.lk

DemoGenie · Internship, AI workshop
Conceived and built an assistant that turns restaurant merchant bookings into demo- prep briefs for sales teams, with business insights, relevant features and tailored pitch ideas, falling back gracefully when the AI is unavailable. Techstack used to build: Next.js · TypeScript · FastAPI · OpenAI API · PostgreSQL
github.com/Joshfd05/DemoGenie

CalTrackr · Personal iOS app
Calorie and workout tracker for iPhone. Set calorie-burn goals, follow a 4-day workout rotation and log sets, reps and weights with a session stopwatch, then review progress on an activity heatmap and weekly chart. Works offline and syncs when back online. Techstack used to build: Flutter · Dart · Riverpod · Firebase
Private project

Chatlo · University mobile app
Cross-platform messaging app built in second year to learn Flutter end to end, with user authentication and real-time chat. Techstack used to build: Flutter · Dart · Firebase
github.com/Joshfd05/Chatlo
