

JOSHUA **FERNANDO**

Student

About Me

I am a second-year Software Engineering student at the University of Westminster, passionate about harnessing technology to solve real-world problems. With a solid academic background and hands-on experience in programming languages like Python and Java, I have developed a strong foundation in software development, complemented by practical knowledge of frameworks such as Spring Boot and Angular. My educational journey has also equipped me with expertise in database management, web development, and UI/UX design, particularly through tools like Figma.

Education

University Of Westminster *2024 – Present*

Bachelor's Degree in Software engineering in progress.

Informatics Institute of Technology *2023 -- 2024*

Foundation Certificate in Higher Education – IT

- Passed with a Distinction

ST. Joseph Vaz College *2011 - 2022*

Completed G.C.E Ordinary Level

- Catholic - A pass
- Sinhala - A pass
- English Language - A pass
- Mathematics - A pass
- History - A pass
- Science - A pass
- Western Music - A pass
- Business & Acc. Studies - A pass
- Info & Comm Technology - A pass

Projects

- **CLI and GUI combined Finance Tracker**

Implemented an interactive finance tracker application in Python with a Tkinter-based GUIand CLI. The application supports CRUD operations for managing financial records, with features for categorizing expenses and generating reports.

- **University Student Management System**

Developed a robust Java-based Student Management System for handling student

Skills

- Programming (Python, Java)
- Database (SQL)
- Web Designing & Development (HTML, CSS, JS, Springboot, Angular)
- Mobile Application Development (Flutter)

Achievments

- Symphony Trophy - Trinity College London - 2015
- Highest Overall Marks Obtained from Grades IV-VI String - 2015

Extracurricular Activities

- Classical Guitar Grade 8 (Trinity College London) - Distinction - 2022 Dec 19
- All Island Inter School W.M & Dance Com. - Mixed Instrument - Second Place - 2016

registration, grade tracking, and report generation. Leveraged Java's OOP capabilities and dynamic programming techniques to implement key functionalities such as data encapsulation, modular design, sorting, and data persistence.

- **Shopping webpage for a website using HTML, CSS, JS**

Designed and built a responsive webpage for an educational website to promote the UN's Sustainable Development Goal on Clean water & Sanitation. The site features a user profile section, a team page, a shopping page and a content editor details page.

- **Marketing website for a mobile application using Angular**

Using Angular designed and developed a responsive marketing and landing website for a mobile application. The site was designed to promote the application and the about and the services provide by the mobile application

- **Minimal Chat Application using Flutter and Firebase**

Developed a minimal chatting mobile application using flutter and firebase, featuring user authentication and instant messaging. Implemented a clean UI and ensured seamless performance.
